POWERED FROM A TOTAL OF **345KWP** OF SOLAR POWER SYSTEM

SUSTAINABLE DINING @ SETIA ECO PARK

Enchanted Gardens. Delicious Cuisines.
All Upcoming, All Anticipating.

Setia Eco Park is proud to have you come and experience a shared space we have created for a different taste of dining experience, community activity and retail therapy.

From a grand total of **345kWp of solar power system**, **D' Network** utilises **207kWp** of this renewable energy supply to power its common areas. Another **138kWp is used to power Elizabeth Falls**, the World's 1st solar powered hybrid waterfall.

So be yourself, gather around and enjoy the sustainable landscapes and experiences we hope will inspire you to shop, play and dine with nature.

A NETWORK OF *UNIQUE* EXPERIENCES

Stretching over 3.16 acres of land, this food emporium has green spaces and inviting restaurants curated for the community to come together and bond over good vibes, creating a network of connectivity. And that is the essence of **D' Network**, connecting people with themselves and with nature.

“

*What makes **D' Network** different is the conducive environment we build that invites endless conversations and new networks from all walks of life. Whether you're coming for a business matter or social gathering, here is where you'll find interconnected spaces that nourish the body with good food, relax the mind, and connect with one's soul.*

the RENEWABLE POWER *from the* SUN EMPOWERING SUSTAINABLE DINING

A free and renewable source of energy, solar power is one of the top ways to help reduce pollution and carbon footprint. As part of S P Setia and Setia Eco Park's DNA, we strive to provide our patrons and the whole community with nature-friendly experiences.

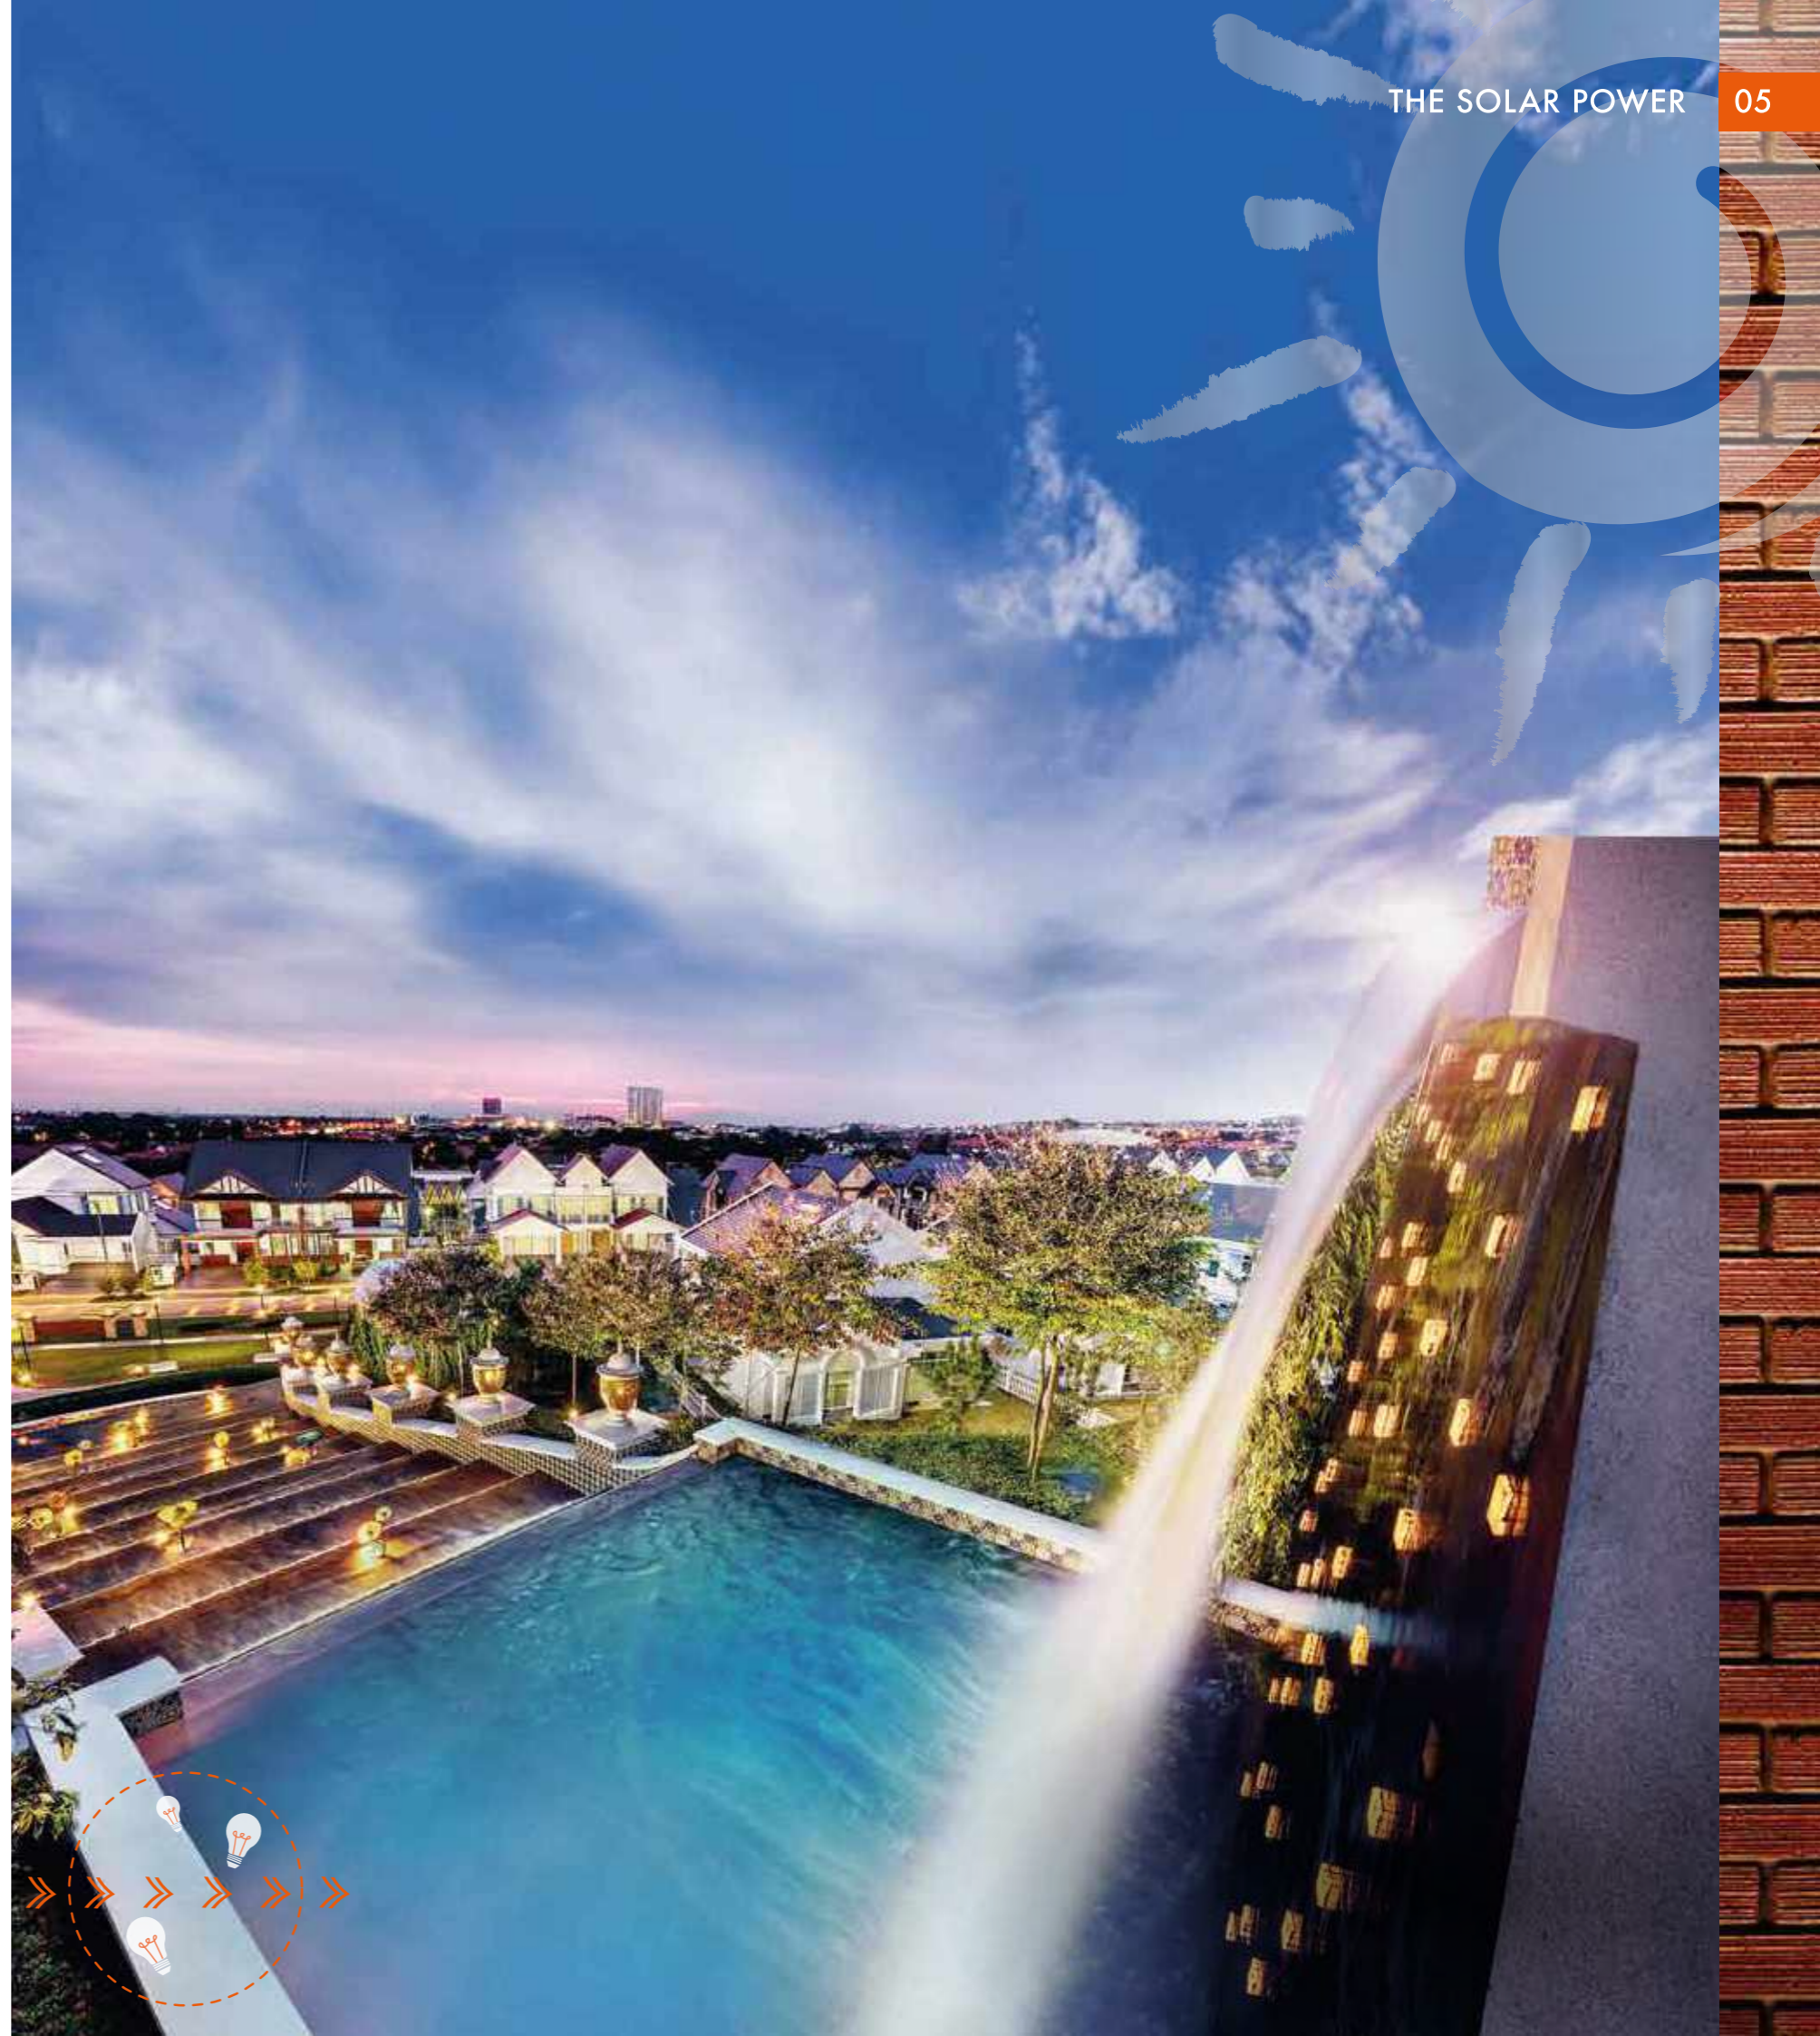

As the World's 1st solar powered hybrid F&B hub, **D' Network** is powered by 207kWp of solar power system, replacing the traditional electricity from grid supply, creating a truly sustainable dining experience for all patrons.

the WORLD'S 1st *solar powered* HYBRID WATERFALL

Another spectacle that leverages on these solar panels is Setia Eco Park's English-inspired waterfall, Elizabeth Falls. The grandeur waterfall is powered by 138kWp of solar power system, making it the World's 1st solar powered hybrid waterfall and a sustainable water feature.

Contact us at 03 3343 2228 for a site tour.

HOW IS

SOLAR POWER GENERATED IN D' NETWORK?

During the day:

1. Solar panels are installed right on the roof top to capture maximum sunlight during the day.

2. The photovoltaic cells in the solar panels transform the solar power into electricity for usage in the various common areas while the excess current will be channelled to the TNB grid as storage.

At night:

1. During night time, the common areas use the excess power generated by the solar power system and storage in the TNB grid during the day. These common areas include lightings, ventilations, air-conditioners, irrigation systems, musical fountain, as well as the upcoming waste composting machine which produces the fertiliser for the plant.
2. Our team of professionals constantly checks the meter to ensure optimum amount of solar powered current is produced and well-maintained.

A NETWORK OF EXCITING ACTIVITIES IN BEAUTIFUL LANDSCAPES

Our solar power energy illuminates and powers the great outdoor fittings of **D' Network** such as the grand chandelier fairy lights, musical fountain and garden lightings.

All of which contributes to the pristine landscape scenery you get to enjoy when you dine in our impressive restaurants.

DINING SUSTAINABLY IS OUR *RESPONSIBILITY*

Not only does **D' Network** offer a great array of cuisines, but we ensure each experience is as 'green' as possible.

So besides utilising solar power at common areas, our incredible hybrid F&B hub will turn food waste into bio-compost through a solar powered microbial compression technology in the near future. The bio-compost (fertiliser) will then be used to nourish the beautiful plants you see in our landscapes.

That way, we can further reduce greenhouse gases while staying true to providing a sustainable dining experience.

SETIA ECO PARK, *the Valley of DREAMS and Creator of D'Network*

An enclave housing an artfully crafted master plan

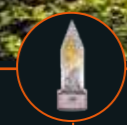

Centred on eco-luxury living, the award-winning Setia Eco Park is designed to **weave around the existing topography to preserve the natural landscapes.**

With just 3.7 units per acre, Setia Eco Park epitomises exclusive living as one of the **biggest high-end enclaves with low-density gated and guarded developments in Klang Valley** consisting exclusively of Semi-Detached homes and Bungalows.

The innovativeness contributes to the high-end security of the township where the entire enclave including individual parcels are guarded by **AgilFence System, an advanced perimeter intrusion detection system used to manage Singapore's Changi International Airport's perimeter boundary security.**

Setia Eco Park dedicates 25% of its eco-landscape to parks, streams and lakes while introducing nectar plants and aquatic reeds to **recreate a habitat and nesting ground for the resident wildlife** like birds, butterflies and fish.

An Amazing JOURNEY

2004

The extraordinary journey began – transforming a 791-acre barren oil palm plantation into a world renowned luxurious gated and guarded enclave.

2006
